Undergraduate Thesis

Thesis Title: Graduation Thesis Template

L^AT_EX Format v1.3.1

Sub-title

Student Name: Iydon Liang

Student ID: 11711217

Department: Department of Mathematics

Program: Computatoinal Mathematics

Thesis Advisor: Donald E. Knuth Professor

Date: December 8, 2019

诚信承诺书

1. 本人郑重承诺所呈交的毕业设计（论文），是在导师的指导下，独立进行研究工作所取得的成果，所有数据、图片资料均真实可靠。

2. 除文中已经注明引用的内容外，本论文不包含任何其他人或集体已经发表或撰写过的作品或成果。对本论文的研究作出重要贡献的个人和集体，均已在文中以明确的方式标明。

3. 本人承诺在毕业论文（设计）选题和研究内容过程中没有抄袭他人研究成果和伪造相关数据等行为。

4. 在毕业论文（设计）中对侵犯任何方面知识产权的行为，由本人承担相应的法律责任。

作者签名:

COMMITMENT OF HONESTY

1. I solemnly promise that the paper presented comes from my independent research work under my supervisor's supervision. All statistics and images are real and reliable.
2. Except for the annotated reference, the paper contains no other published work or achievement by person or group. All people making important contributions to the study of the paper have been indicated clearly in the paper.
3. I promise that I did not plagiarize other people's research achievement or forge related data in the process of designing topic and research content.
4. If there is violation of any intellectual property right, I will take legal responsibility myself.

[ABSTRACT]: Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris. Nam arcu libero, nonummy eget, consectetur id, vulputate a, magna. Donec vehicula augue eu neque. Pellentesque habitant morbi tristique senectus et netus et malesuada fames ac turpis egestas. Mauris ut leo. Cras viverra metus rhoncus sem. Nulla et lectus vestibulum urna fringilla ultrices. Phasellus eu tellus sit amet tortor gravida placerat. Integer sapien est, iaculis in, pretium quis, viverra ac, nunc. Praesent eget sem vel leo ultrices bibendum. Aenean faucibus. Morbi dolor nulla, malesuada eu, pulvinar at, mollis ac, nulla. Curabitur auctor semper nulla. Donec varius orci eget risus. Duis nibh mi, congue eu, accumsan eleifend, sagittis quis, diam. Duis eget orci sit amet orci dignissim rutrum.

[Key words]: L^AT_EX, R Markdown, pandoc

Contents

1. Markdown Syntax	1
2. Markdown extensions by bookdown	1
2.1 Cross reference and citation	1
3. Chapter	2
参考文献	3
A Code	4
致谢	6

The following are useful for understanding R Markdown:

- Authoring Books and Technical Documents with R Markdown
- R Markdown: The Definitive Guide
- R Markdown Cookbook

1. Markdown Syntax

EMTH, *Italic*, H₂SO₄, Fe²⁺, Footnote¹

- list
- list

1. Numbered list
2. Numbered list

- a. Alternative numbered list
- b. Alternative numbered list

Inline Math $a^2 + b^2$, Math block:

$$\sum_{i=1}^{\infty} \frac{1}{n^2} = \frac{\pi^2}{6}$$

2. Markdown extensions by bookdown

Bookdown supply an extension of pandoc, which is already a superset of plain markdown and TeX.

2.1 Cross reference and citation

^[1] supply a neat way to do cross citation of “theorems”(or numbered environment) and proofs(or unnumbered environment), in which you can write anything freely(even recursively)^[2,3].

Check source code of theorem 2.1, figure 1, table 1 to see how they work.

We refer to here for all supported environments.

Theorem 2.1 (Fermat’s Last Theorem). *For $n \geq 2$, there is no $a, b, c \in \mathbb{N}^*$ s.t.*

$$a^n + b^n = c^n$$

Proof. I have discovered a truly marvelous proof of this, which this margin is too narrow to contain □

import pandas as pd
import tushare as ts

def get_data_via_tushare(stocks, start=None, end=None, method=None, ignore=None):
    '''Get `stocks` data via `tushare.{method}` from `start` to `end`.

    Argument
    -----
    stocks: dict, `stocks.keys()` is the names of `stocks`,
           `stocks.values()` is the code of `stocks`.
    start: str, default is '2018-04-01', its format matches '%Y-%m-%d',
           see also `time.strftime`.
    end: str, default is '2019-04-01', its format matches '%Y-%m-%d',
           see also `time.strftime`.
    method: str, default is 'get_k_data', attribution of `tushare`
    ignore: Iterable, default is '["date", "code"]', which cannot appear
            in `return_value.keys()` (value of return statement).

    Return
    -----
    dict, and `ignore` has no elements in `return_value.keys()`.
           type of `return_value.values()` is `pandas.core.frame.DataFrame`.

    Require
    -----
    Python 3.7.4
    ts: `import tushare as ts`, test version 1.2.48.
    pd: `import pandas as pd`, test version 0.25.2

    Example
    -----
    >>> stocks = {'50ETF': '510050', '500ETF': '510500'}
    >>> start, end = '2018-04-01', '2019-04-01'
    >>> method = 'get_k_data'
    >>> data = get_data_via_tushare(stocks, start, end, method=method)
```

```

>>> data.keys()
dict_keys(['open', 'close', 'high', 'low', 'volume'])
>>> data['close'].head()
           50ETF  500ETF
date
2018-04-02  2.702    6.424
2018-04-03  2.693    6.373
2018-04-04  2.694    6.321
2018-04-09  2.711    6.331
2018-04-10  2.775    6.380
